AUREUS TOKEN

Based on binance smart chain. Aureus token will be used to reward players by completing game milestones.

Before game release, aureus tokens will be available to buy/sell on pancakeswap and we're planning to get listed on more exchanges as time passed by.

To avoid high selling pressure, you must hold at least 500, 000 of Aureus Tokens in order to play the game.

Aside from selling the tokens for profit, you can also use it to buy in-game items to power up your character.

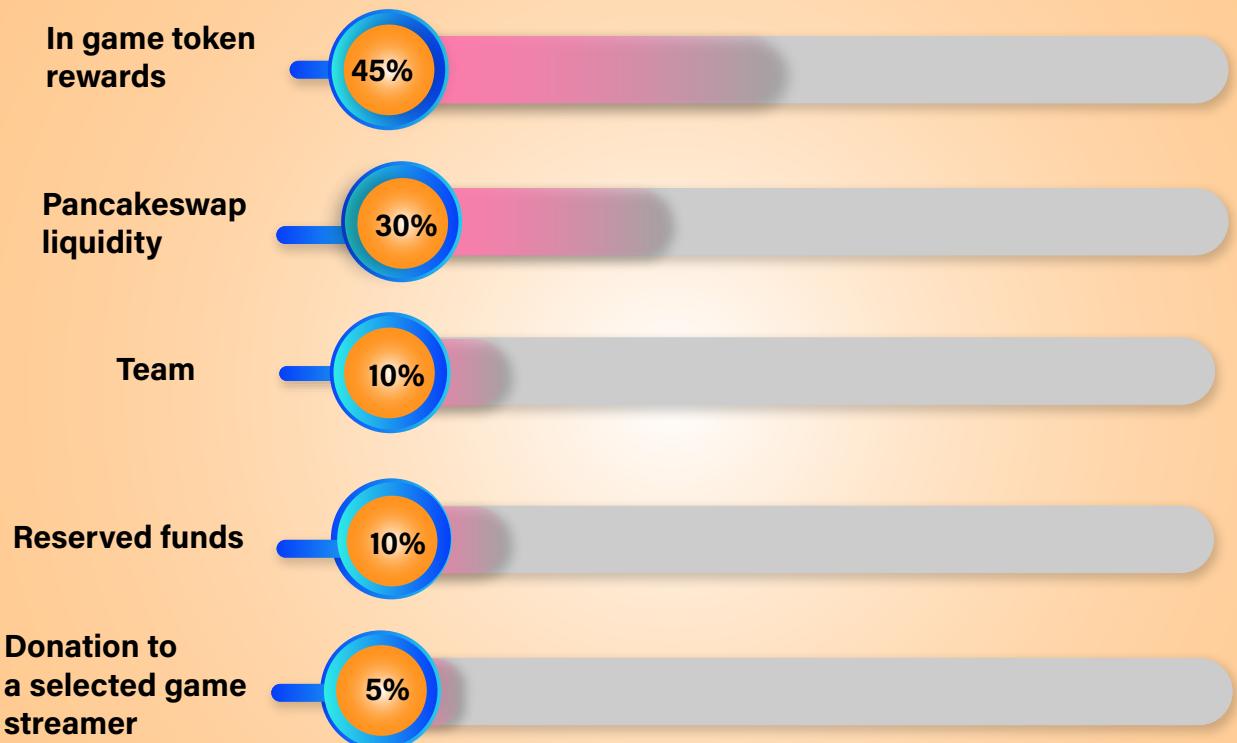

We've ensured a partnership with another token where you can use Aureus Tokens for yield farming in order to generate high returns for your tokens.

Introduction

Binance Smart Chain (BSC) is known as a blockchain operating on mainnet, activating the blockchain in parallel with Binance Chain. BSC allows the creation of smart contracts for blockchain tokens associated with the Binance brand. Aureus token is built on top of the binance smart chain, making transactions fast, secure and affordable. We are taking the gaming experience on blockchain to a different level by associating the Aureus token to an already developed online game.

The possibilities are endless. Everyone can enjoy a real gaming experience while earning at the same time. Aureus is programmed to have the cheapest transaction fee and does not implement tax. Tokenomics will be discussed on a separate page. As gamers, we know the struggles of playing games on blockchain. Blockchain limits us with graphics and gameplay features. So we decided to implement a token where everyone can enjoy an RPG, a virtual world where you can choose what you want to do and get rewarded for it.

Token Distribution

Aureus Tokenomics

1 000 000 000 total supply

12% tax

3% is distributed to holders

3% goes to liquidity, locked for 100 years

6% goes to marketing and manual buyback and to get tier 1 influencers

Auto liquidity + rewards to holders = better price floor

Distributing rewards to our holders allow us to gain more investors, since rewards will be sent automatically, all you need to do is keep your tokens in your metamask, trust wallet or safepal and you will be rewarded.

Be a HODLER and get rewarded for it.

The Game

What is Rohan?

Rohan is a massively multiplayer online role-playing game that allows players to play with another character within the game world, explore lands, kill monsters, engage in quests, perform magic, adopt a pet, buy a mount, and interact with NPCs and other players.

Requirements to play

1. Wallet address - This is where the rewards will go to.
2. NFT character - Your wallet address should have 1 nft character on it. You can buy one from our official account:
<https://app.airnfts.com/creators/0xF0B21F9D8936e7042fEae14F87FD1e54b9bCC3c6>
3. Aureus tokens - Your wallet address should have at least 500,000 aureus tokens in it.
4. If the system detects your wallet address doesn't have an NFT character or 500,000 aureus tokens in it. Your account will be suspended and can only play again if these 2 requirements are met.

Rewards

On released, rewards can only be received by completing the daily quest.

A maximum of 38 000 Aureus Tokens can be obtained in a day (may change with future updates and token price)

We suggest completing the daily quest first before farming your in-game items.

Once we obtained the required number of players, other rewards can be obtained by:

- * leveling
- * PVP
- * Participating in in-game events
- * Township battle

These will be released during server updates.

Aureus Tokens will be sent to your registered wallet address on a daily basis.

Announcement will be sent once rewards distribution is complete.

FAQs

1. Can I use dual client?

- Yes. You can use as many clients as you can as long as your PC can handle it.

2. Can I play rohan on a browser or phone?

- No. Rohan is only available for PC.

3. How can I make multiple accounts?

- 1 wallet address = 1 account. If you want to create multiple accounts, make sure you create multiple wallet addresses too and requirements are followed on each wallet addresses. See requirements to play section

4. What can we do with Aureus tokens we earned?

- You can sell it or save it to buy in-game items on our item mall to power up your characters.

5. Is forging available?

- Yes.

6. Where to buy Aureus Tokens?

- Currently, Aureus tokens are available to buy/sell on pancakeswap: <https://pancakeswap.finance/swap>
